8.1.1The multiplication of two square matrices.

A] code

```
a=int(input("dimension: "))
print("first matrix:")
A= []
for i in range(a):
        r=(list(map(int,input().split())))
        A.append(r)
print("second matrix:")
B = []
for i in range(a):
        r = list(map(int,input().split()))
        B.append(r)
result=[]
for i in range(a):
        result.append([0]*a)
for i in range(a):
        for j in range(a):
                for k in range(a):
                        result[i][j]+=A[i][k] * B[k][j]
print("Resultant Matrix:")
for row in result:
        print(*row)
```
