8.1.2prime numbers within a given range

A] code

```
start=int(input())
stop=int(input())
f=False
for num in range(start, stop+1):
    if num > 1:
        flag=True
        for i in range(2, int(num ** 0.5) + 1):
            if num % i == 0:
                flag = False
                break
        if flag:
            print(num)
            f=True
if not f:
    print("No primes")
```
