10.1.1 Remove Punctuations from a String

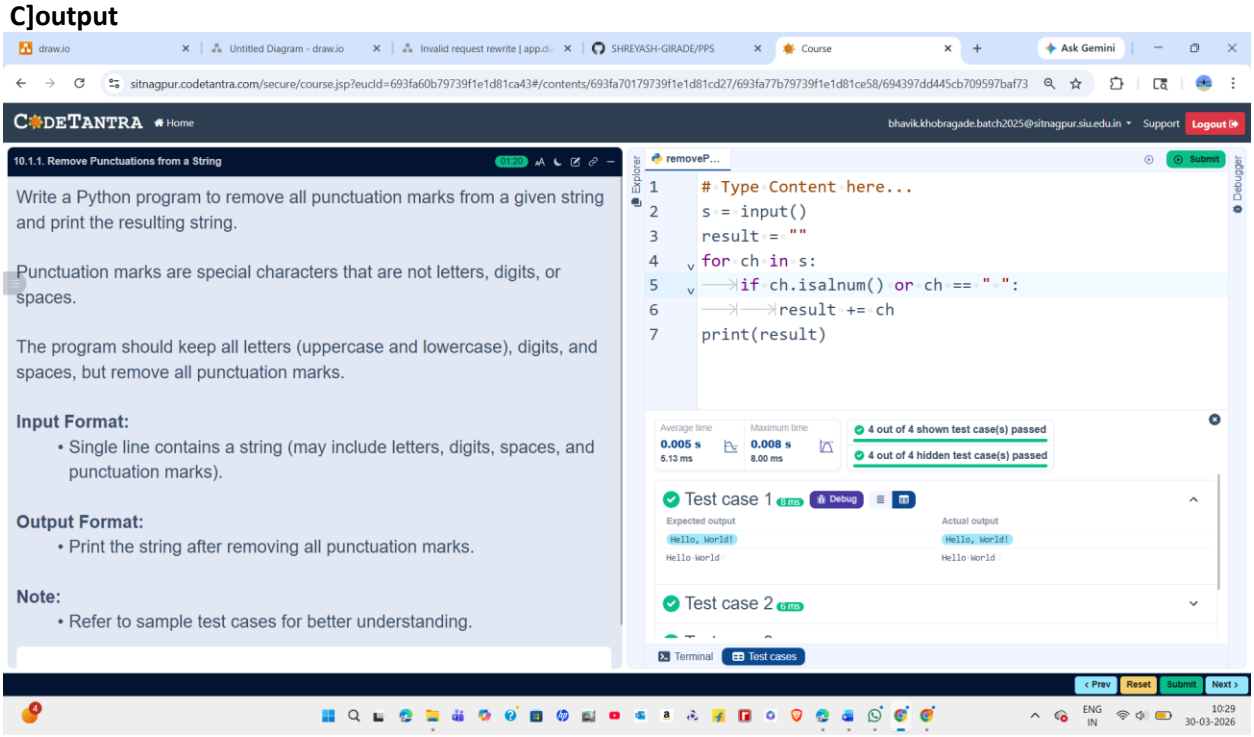
A] Algorithm

Step 1: Start
Step 2: Read input from the user and store it in variable a
Step 3: Initialize an empty string chk = ""
Step 4: For each character i in a, do the following:
    Step 4a: If i is alphanumeric or a space, add it to chk
    Step 4b: Otherwise, ignore i
Step 5: Print the string chk
Step 6: End

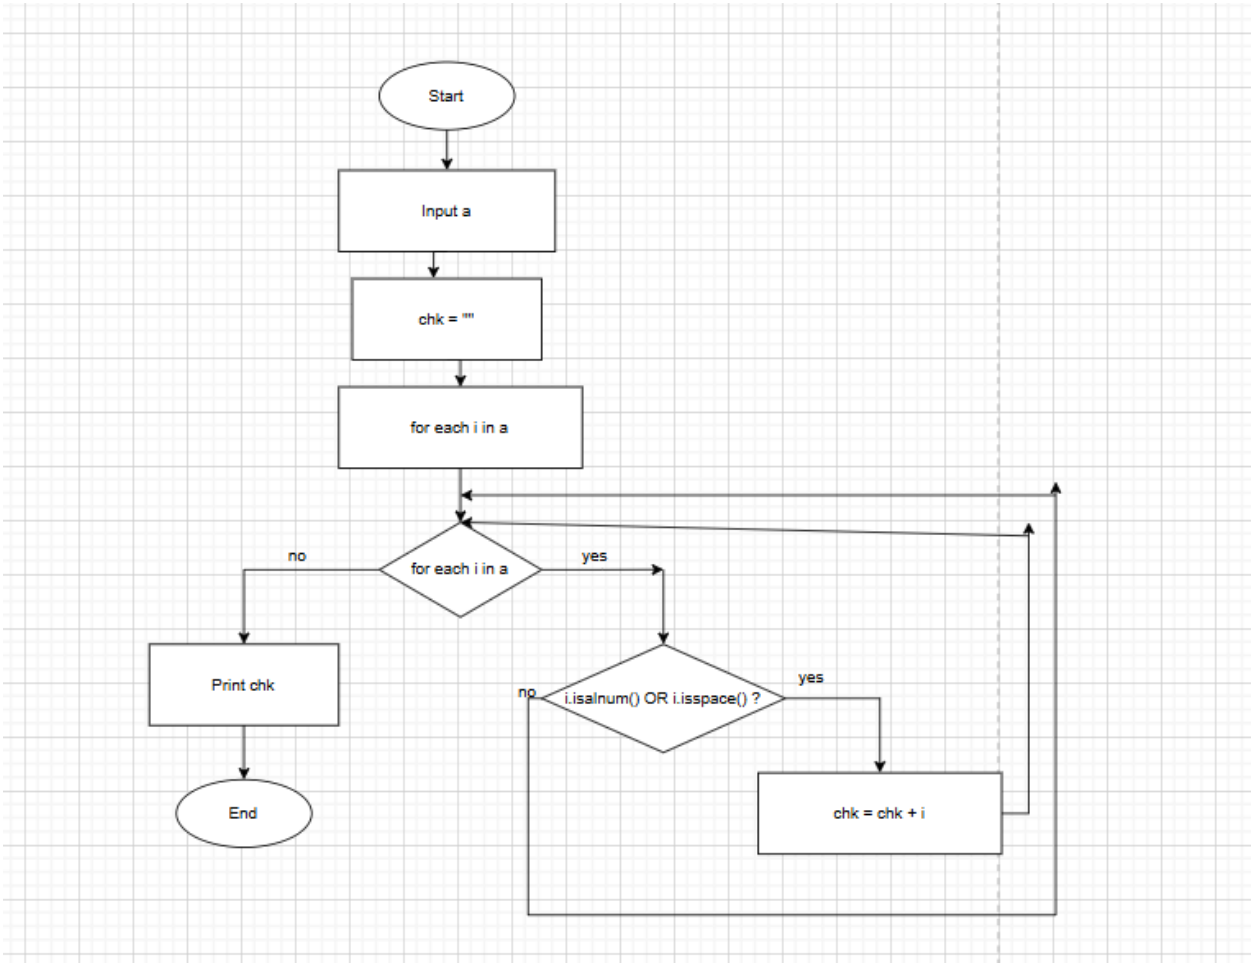
B] code

```
a = input()
chk = ""
for i in a:
        if i.isalnum() or i.isspace():
                chk += i
print(chk)
```

C]output



D] flowchart



Start
Input a
chk = ""
for each i in a
for each i in a
no
yes
Print chk
End
i.isalnum() OR i.isspace() ?
no
yes
chk = chk + i
