7.1.1 Inverted star pattern.

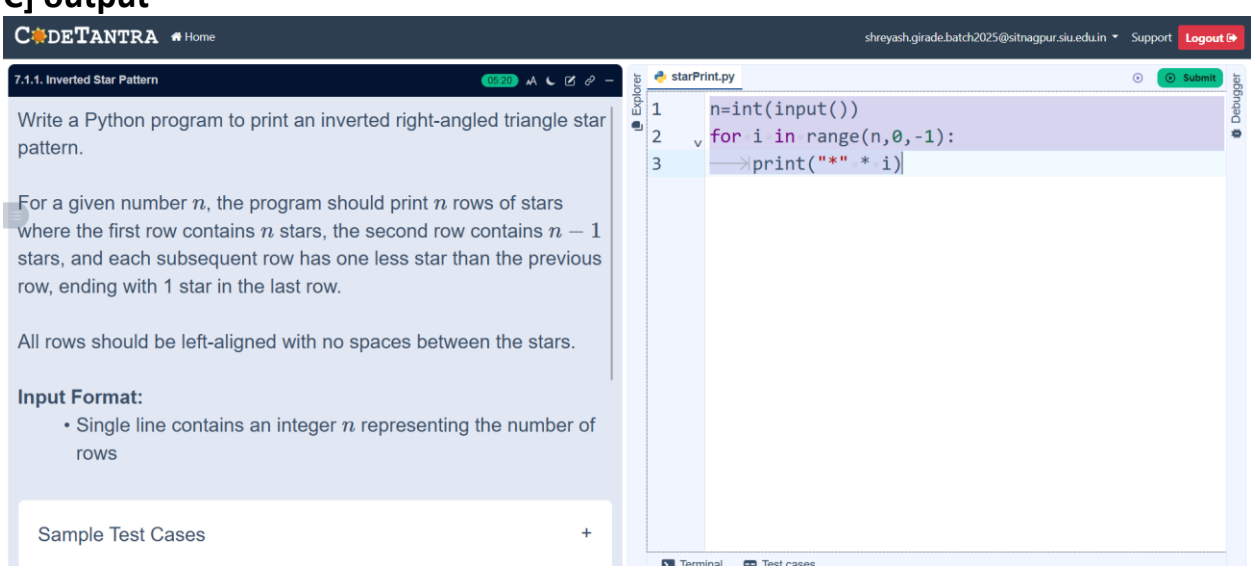
A] Algorithm

Step 1: Start
Step 2: Input an integer value n
Step 3: Initialize loop variable i from n to 1 with decrement of 1
Step 4: Check the condition i >= 1
Step 5: If condition is true, print "*" i times
Step 6: Decrease the value of i by 1
Step 7: Repeat Steps 4 to 6 until the condition becomes false
Step 8: Stop

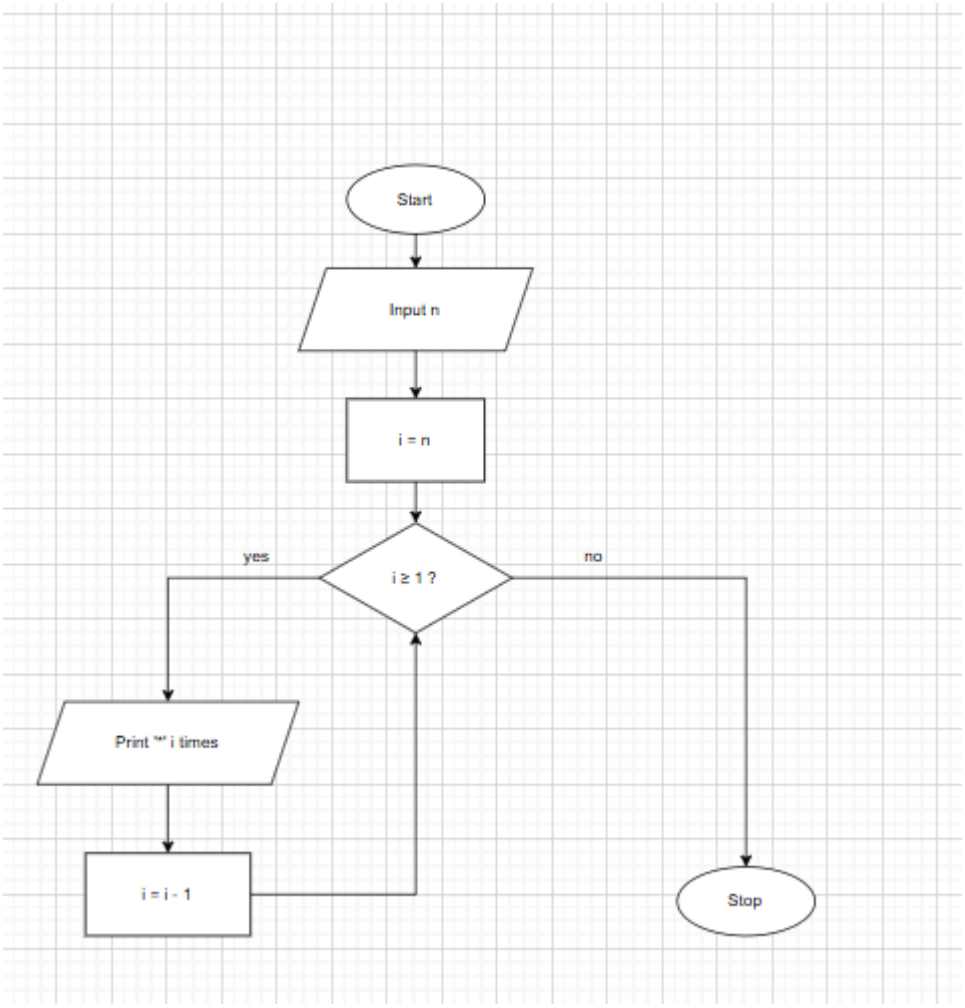
B] code

```
n=int(input())
for i in range(n,0,-1):
        print("*" * i)
```

C] output



D] flowchart



Start
Input n
i = n
i ≥ 1 ?
yes
no
Print '*' i times
i = i - 1
Stop
