## 10.1.1 Remove Punctuations from a String

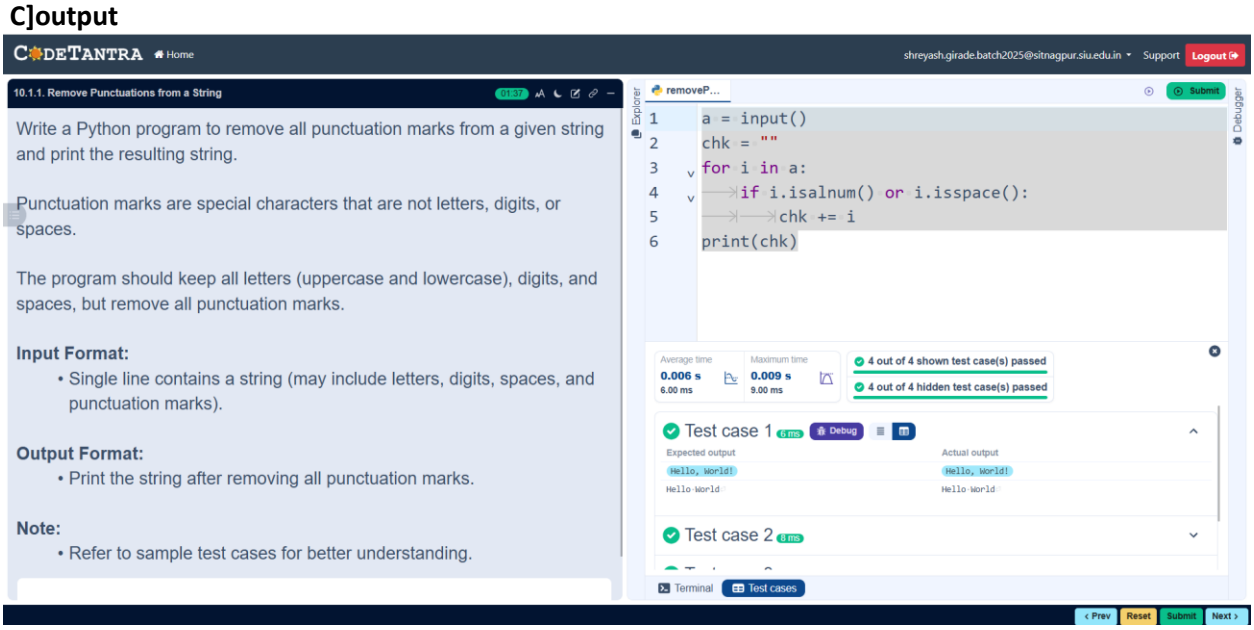
### A] Algorithm

**Step 1:** Start
**Step 2:** Read input from the user and store it in variable a
**Step 3:** Initialize an empty string chk = ""
**Step 4:** For each character i in a, do the following:
    **Step 4a:** If i is alphanumeric or a space, add it to chk
    **Step 4b:** Otherwise, ignore i
**Step 5:** Print the string chk
**Step 6:** End

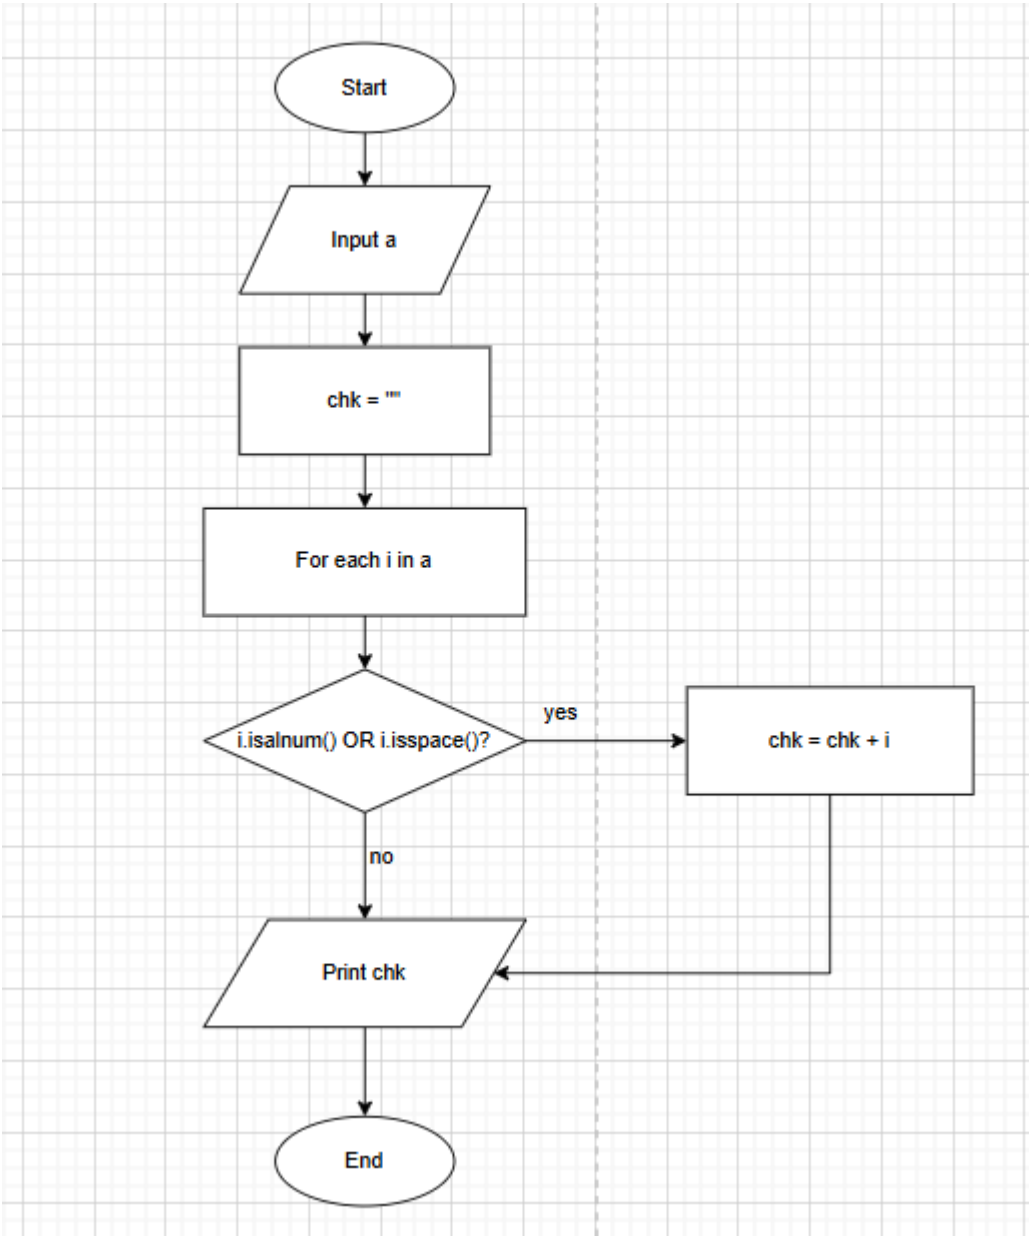
### B] code

```
a = input()
chk = ""
for i in a:
        if i.isalnum() or i.isspace():
                chk += i
print(chk)
```

### C]output



**D] flowchart**



Start
Input a
chk = ""
For each i in a
i.isalnum() OR i.isspace()?
yes
chk = chk + i
no
Print chk
End
